BARON CEMETERY [MC01] - MIDDLECREEK TWP. - READING ERRORS

While extracting the data from this cemetery for the Deaths Database, several obvious reading errors in year dates were found. So the compiler [OLF] has decided to insert this discussion of them.

On page 4, graves 88 & 89, David and Magdalena Tedrow: The death year reading for David is given as 1862, aged 71 years, and for Magdalena his wife as 1819, aged 92 years. At my request, Cynthia Mason checked the census data for 1850 and 1860 and found both were 63 in 1850 and 73 in 1860. Thus the calculated birth year for both as about 1787. If Magdalena was born about 1787 and died aged 92, the death year would be 1879. So the "7" was apparently misread as a "1".

On page 8, grave 182, Adiee Bruner: The death year is given as 1819. But her siblings in graves 181, and 183 died in 1883 and 1879, respectively. So again, as in the instance above, a "7" may have been misread as a "1". Thus the probable year should be 1879. None of these children lived through a census year, so it is not possible to check for them there.

On page 11, graves 260 and 261. Josiah and Mary Crise: Josiah's death is given as 1854 aged 71, and Mary's is given as 1974, aged 101. The 1974 is an obvious typo, since that is about 30 years AFTER the cemetery was read. Again, at my request, Cynthia checked the census data to try to resolve these date errors. Following is from her note to me.

The Crise situation only got muddier. The census shows:

	Calc. birth years	
	Josiah	Mary
1850--Josiah 26, Mary M. 36	1824	1814
1860--Josiah 37, Mary M. 47	1823	1813
1870--Josiah 45, Mary M. 57	1825	1813
1880--Josiah 56, Mary 67	1824	1813

So far so good: the census does show a 10-year-gap in their ages. The problem: the tombstone death dates have his death date as 1854 and hers as 1874. So either their ghosts kept getting enumerated in the census, or some dates are wrong somewhere. Mary is in the 1900 census, widowed, age 87, and in the 1910 census age 96.

The names (and the absence of other people with the same names in the census indices), the 10-year-age difference, and Mary still living at age 96 in 1910 all point to this being the right couple. But how did the tombstone dates get so far off???? I have no answer for that at the moment.

So if Josiah was born about 1824 and died aged 71, his calc. death year should be about 1895 (or 1894 if the tombstone "9" was misread as a "5")?

And if Mary was born about 1813, and died ages 101, her calc. death year should be about 1914. Considering the several instances given above where "7" was misread as a "1", the 1974 probably should be "1914."

On page 12, grave 291, Catherine, wife of Charley Hennenkamp: The reading has her born 1814, died 1924. Her calc. age would then be 110. However, Charley Hennenkamp, grave 290 was born in 1870 and died after 1900, possibly after the cemetery was read in the 1930's.. So, again the probable error is a misreading of a "7" as a "1", and she was probably born in 1874.
